Embed Kanopy Streaming Video into Blackboard

**Step 1:** Find the film in Kanopy that you wish to embed.

**Step 2:** Get the Embed code for the video.

- Below the video you will see a toolbar.
- Click on Share/Embed, and then click the Embed tab.
- Copy the code.

**Step 3:** Embed video into Blackboard as an Item.

- Within Blackboard, create an "item".
- Give the item a title, but do not paste the code in the content box below.
- Instead, click the tiny HTML icon, which will launch a separate text box.
- Paste the embed code here. ADD AN “S” TO THE END OF THE “HTTP” PORTION!
- Hit Submit several times until you are back in the content area.
- Refresh the webpage and you should see the video right there in Blackboard.
Why use the ‘embed’ code?

- Embedding the html code provided by Kanopy allows students to watch the video directly in their Blackboard course page.

- Sharing the URL, on the other hand, will require your students to open a new website to access the video.
  - It also requires you (as instructor) to place the library’s Proxy login html code prior to the Kanopy URL to prompt the students to login to the library’s subscription before they can access the film.

- Using the embedded option circumvents the various complications for both instructor and students.
Step 1: Find Your Film

- Locate the film in Kanopy that you wish to embed.
  - Go to Thompson Library homepage: [http://go.umflint.edu/library](http://go.umflint.edu/library)
  - Navigate to the Kanopy database using the:
    - A-Z Database List
    - Resource Subject Guides
    - Direct link to Kanopy

- Search Options in Kanopy:
  1. Use the Search Box to look for specific titles or subjects.
  2. Use the “Subjects” drop-down box to browse by academic field.
From the Library homepage, navigate to Kanopy through the
• A-Z Database List,
• Subject Resource Guides, or
• Direct link to Kanopy.
Search Option 1:

Type in specific title or subject terms.
Scroll through the Results List.

- Kanopy gives you the number of results.
- You can filter results using the left-side menu.
- It might be helpful to combine search terms, e.g. psychology AND depression.

Select film from the list.

1,252 results for "Psychology"
Search Option 2:
- Use drop-down “Subjects” menu.
- Click a broad academic field, e.g. Social Sciences.
Select narrower academic discipline from the list that appears.
Scroll through list of videos.
Select desired video by clicking on image box.
You are now on the video’s page.
Step 2: Get the Embed Code

- Below the video you will see a toolbar.

- Click on Share, and then click the Embed tab.

- Copy the code.
Click Share.
Click Embed.
Highlight the code and copy it.
Step 3: Embed Streaming Video into Blackboard

- Within Blackboard, create an “Item”.

- Give the item a title, but do not paste the code in the content box below.

- Instead, click the HTML icon, which will launch a separate text box.

- Paste the embed code here. **ADD AN “S” TO THE END OF THE “HTTP” part of the embedded code!**

- Hit Submit several times until you are back in the content area.

- Refresh the webpage and you should see the video right there in Blackboard.
Step 1) In Blackboard, create an Item.

Step 2) Name the Item.

Step 3) Click HTML button on toolbar.

Step 4) In the HTML box, paste the embedding code copied from the Kanopy database video.

Remember to add an “s” after “http”

Lastly, hit the SUBMIT buttons, until you return to the content/assignment page.

Refresh the webpage.

The video should now be on your Blackboard page, ready to play.
